ForexGoldenGoose Expert Advisor (EA)

ForexGoldenGoose 8.xx System Notes

ForexGoldenGoose ULTIMATE 8.xx - Shifts to TREND TRADING - A number of users have had problems trading with version 7.xx due to spread widening by brokers. With a tight 10 pip StopLoss many users reported premature StopLoss hits due to spread widening by brokers. This version changes the method of trading to a more Broker friendly trend trading style that the majority of brokers are more compatible with. Also since it doesnt depend on more Scalper style trading that brokers discourage with "Off Quotes" and Server Delays - More users will find success with this Trend traders style of trading.

Forex Trading proves the old saying that "You have to be in it to WIN IT!!" - Forex trading more than any other investment requires that you take maximum advantage of ANY opportunities that the market presents. This NEW trend trading style will extract EVERY AVAILABLE PIP that the market gives us. I've accepted the logic that you can't take more from the market than it's willing to give.

GoldenGoose 8.xx with capture every large market move that the Forex exposes. To see it in action Please Backtest this version from 6/1 to Present and you will see how you will profit from the new logic. I've come to grips with the true nature of the Forex Market: Usually the market will move within pretty tight ranges that trend traders can't really make to much profit from BUT on quite a regular basis the market will move for HUNDREDS OF POINTS - This is were you will MAKE A KILLING!!! - This EA Will Capture Every Possible Pip of Those Large Moves!!

For Example: In Backtests with a 10K account. In June this EA makes \$3,078.29 with Only 5.56% Drawdown - In July the market didnt really takeoff in any particular direction and only nets \$142.12 without 9.37% Drawdown. Basically anything the market gave us it took back but the EA kept us afloat without generating a loss in the account - Running from 8/1 to 8/8 shows \$2,045.53 with only 2.89% Drawdown.

From 6/1 to 8/8 this trading system would have netted: \$5,3417.19 with only 9.33% Drawdown. An amazing 53.41% Return in 2+ Months. - And AMAZINGLY the EA would still be in the current trade thats UP \$2045.46 AND STILL CLIMBING!!

GoldenGoose 8.01 JUNE - <http://forexcashtools.com/testresults/fgg801june.htm>

GoldenGoose 8.01 JULY - <http://forexcashtools.com/testresults/fgg801july.htm>

GoldenGoose 8.01 AUGUST - <http://forexcashtools.com/testresults/fgg801august.htm>

THIS IS THE WAY TO PLAY THE FOREX! - Take what the Market Gives YOU!!! - Don't Force It!! For those of you that have heard of 'Turtle Trading' (one of the most successful trading systems ever created) this is almost a similar philosophy. Play the market going for the big wins. Enter on your best chances to net big gains. Minimize your losses when the entries don't pan out into LARGE Wins but always enter the market when the opportunities and odds

favor you catching a WHALE!! ForexGoldenGoose 8.xx will CATCH THE WHALES FOR YOU - Each and EVERY TIME!!

This actually addresses one of my greatest regrets with previous systems. I hated when previous EA's would only capture 20 or 30 pips of a LARGE 100+ pip move. This isn't a problem any more. FGG 8.xx is a WHALE HUNTER.

- Please check back to get 8.xx versions that contain minor interface tweaks.
